

Design and cartography 2024 | max2.at

MTB A short route featuring magnificent trails on the southern slopes of Monte Biaena.

The tour starts along the main road towards Passo Bordala, which you follow for about 1 km. At a prominent large crossroads, turn left, then pedal away from traffic through meadows and woods, reaching Passo Bordala after just over 3 km. The journey continues comfortably through agricultural areas with slight elevation changes, until after a descent, you arrive at the hamlet of Corniano. Here begins a spectacular trail, partly on rocky terrain but still safe, surrounded by extraordinary vegetation and offering beautiful views over the valley. At the end of the tour, there's a final climb of 200 meters in elevation to return to the starting point in Ronzo-Chienis.
