MTB Entertaining circuit on the slopes north of Tenno.

There's never a dull moment on this tour. Varied climbs, descents and flat sections, changing terrain and a series of sights make for an unforgettable MTB experience. But let's not get ahead of ourselves. Start by ascending to the picturesque medieval village of Canale di Tenno. From there things get flatter until you reach the shimmering, turquoise Lago di Tenno. After a long climb along the wooded slopes at the foot of Monte Misone, you have the option of branching off to Rifugio San Pietro, which is a lovely spot for a break, with its unique setting and beautiful views over Lake Garda. Shortly after that you arrive at the highest point of the tour at Sella di Calino. After reaching the hamlet of Vespana you have to climb again, then you coast along through woods and meadows, initially on gravel, later on tarmac, back to your starting point in Tenno.
