## MTB Long, stunning tour on the edge of the Brenta Group

Start from Ponte Arche and ascend to Stenico, then continue to Val Algone, the valley that borders the Brenta Group on the western side. The mighty limestone giants of the Brenta Group accompany you on the right side of the valley as you cycle up to Malga Movlina, firstly on a tarmac road, later on gravel tracks. Near the Passo del Gotro (1858 m), the highest point of the tour, there are a few short, very steep sections where it's required to push your bike. When you reach Lago di Valagola, an idyllically situated mountain lake, it signals the end of all the challenges. You now cycle north along the Valagola on forest tracks. Shortly before Madonna di Campiglio, turn west and cycle first on minor roads, later on a cycle path along the Sarca through Val Rendena to Tione di Trento. Eventually you return via Stenico to the starting point in Ponte Arche, having covered 76 kilometres.
